

Bachelor of Science Psychology

Program Purpose: The TROY program in psychology gives the student grounding in the study of human psychology from early development to adulthood, covering a variety of psychological concepts and theories, statistics, and research and analysis.

Psychology is the science concerned with the understanding of behavior and mental processes. A major in psychology provides students with (1) a useful foundation for further study at the graduate level, leading to various careers in psychology, or to study in the health professions and social work; (2) skills related to employment at the baccalaureate level for the pursuit of careers in mental health services, industry, human services or areas where the knowledge of behavior would be deemed beneficial; and (3) a sound preparation for describing, understanding, predicting, and controlling the events in their own lives. Students who obtain an advanced degree have a growing range of new opportunities for employment in medical settings, sports, business, the military, as well as private practice, university teaching, and research.

(For complete details on this program including course descriptions, academic policies, etc. please refer to the Troy University catalog at <https://resources.troy.edu/catalogs/1819undergraduate/index.html>)

The BS Degree in Psychology at Troy University **requires:**

1. 45 semester hours of General Studies courses.
2. 36 semester hours of Psychology courses – including 12 semester hours of upper level core required classes and 24 semester hours of specialized upper level advisor approved Psychology electives.
3. 18 semester hours of an Advisor Approved minor
4. 21 semester hours of free electives (approved by Academic Advisor)

BHMT sponsored students entering this program will likely enter as transfer students having already earned college level credits through studies with a BHMT academic partner. Transcripts from any previous colleges attended will be requested of all program applicants (unofficial transcripts will satisfy this request initially) and applicable transfer credit will be mapped into the program plan that follows providing the applicants with a clear picture of how many transfer credits could be awarded and, logically, how many credits will then be required at Troy University in order to be awarded the Bachelor of Science in Psychology. This academic plan will be developed working with a member of the Troy University Admissions Team.
