

# Mobile Learning for a Mobile Life

Take your education in the palm of your hand with the Relias Learner app

Designed around your mobile life, the app gives you the flexibility to take assigned courses when it's most convenient for you. By syncing to the Relias Platform, you can seamlessly pick up where you left off or start from the beginning – helping you avoid the stress of overdue training.

The app contains a modern design that's easy to use, which helps you focus on what's most important – the content. Once you've finished a course, you can complete the evaluation and exam within the app and share the certificate with your supervisor.
